

# THE GLEICHEN CALL

VOLUME XXX NO. 18

GLEICHEN, ALBERTA, WEDNESDAY JULY 21, 1937

SUBSCRIPTION \$2.00 PER YEAR

## REPORT OF LAST MEETING OF TOWN COUNCIL

The July meeting of the town council was attended by Mayor Purcell and Councillors Menard, McConnell, MacDonald and Michaud.

As the Canadian Legion proposed to apply for a Cross of Sacrifice for the soldiers' cemetery in Gleichen, it was decided necessary before this could be obtained to secure a document to the plate in the cemetery allotted for the use of the Canadian Legion. The secretary was instructed to take the matter up with the Department.

The hole beside the ditch running through the town from which the earth had been removed has not been filled as agreed by the company. This is filled with stagnant water, and is scouring and becoming a breeding place for flies, etc. and is also a danger to small children. It was decided that if the hole was not filled by a certain date the work would be done by the town and same charged to the property.

The swimming pool came in for some discussion and it was suggested the deck chairs be placed in the pool for the guidance of swimmers. The master was left in charge. The secretary was instructed to write the attorney general's department regarding the collection of acreage taxes.

The town policeman was instructed to take immediate steps to collect all outstanding dog licenses and investigate the complaints regarding stray ears running around town as disturbing the peace both day and night.

A letter had been received from the department of public works, Edmonton, in connection with the use of the scarder for the streets of the town. This could be obtained by arrangement with the operator, the cost to same would be \$6 per hour for the scarder, and \$3 per hour for blading plus extra incurred by the operator should his truck remain overnight in town. The master will be left in the hands of the public works committee with power to act.

L. Michael was appointed deputy mayor for the ensuing three months from July 15 to October 15. An account had been submitted from R. A. Brown, formerly of Gleichen, to supplies issued to a relief recipient during the time he operated a store here. The account was ordered file as this issue was not authorized by the town. The public works and finance committees were authorized to make arrangements to move the garage situated in the east end of the town to another location. It had been requested that buildings had been broken into in town and the secretary was instructed to notify those concerned that this must stop.

There were a number of other subjects discussed but settlement was left over for another meeting.

## THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan."

One picture is worth 10,000 words. This is a Chinese proverb, though years of old, and, as with all Chinese aphorisms, contains the essence of truth itself.

"The Crop Testing Plan" took cues from this fine saying this ancient Chinese proverb, and, by growing samples which represent farmers' actual fields of wheat, make "living pictures" of thousands of individual fields in order to demonstrate to the eye their trueness-to-variety, or whether they contain undesirable unprofitable mixtures.

These "field pictures" or demonstrations, may be seen during the next few weeks growing at over 100 points in Western Canada, and field days are held during which the material is demonstrated and explained by expert cerealists and plant breeders.

The plots show in addition the new rust-resistant wheat varieties with too, some new crops gathered from the four corners of the earth, of interest to Canadian farmers.

It would be worth the time of all who are interested in the advancement of agriculture to attend one of these field days, the object of all being to improve wheat quality, and so help the farmers' wheat on world's markets at better prices, hence

## FORMER GLEICHEN BALL PLAYERS PLAY THE GAME

The third annual baseball game by former Gleichen ball players took place last Wednesday afternoon with Rockyford Old Time team as rivals before a surprisingly large crowd.

By the time the ninth inning was played both teams were tied at 6-6.

The Rockyford team was a couple of men short so the local ball club supplied two splendid players Blaney and McMillan. The Gleichen team had plenty of players on hand but were short three crack men in the persons of R. Burrows; the home run king of Gem, who had run a nail in his foot a few days previously and was unable to be present; Miller, pitcher of Arrowwood and Bentin another pitcher of Mossleigh. However Miller arrived on the scene at the beginning of the seventh and relieved McArthur in the box. McArthur had been doing well considering the years that have passed since he last played that position.

Rockyford went to bat first, McArthur threw four balls and the side was retired. In the second Rockyford made a home run but they also scored in the third. McArthur decided it was time for Gleichen to get a look in an attempt to third place. He did so by a ball thrown from the cut foul and barely hit down the house. Gettling about half way to the home plate tried to stop and go back for getting he had spikes on his shoe shell. Meantime the catcher failed to hold the ball so Doe got to his feet and romped home to the delight of the fans. Gleichen made another run but he was also in the fourth. Rockyford finished off their runs by making three in the sixth. With Miller's arrival the Gleichen bats were strengthened considerably. Gleichen scored in the 7th and made w<sup>o</sup> more in the ninth. McArthur ended the tying run when Stinson batted and Bushman committed a foul.

Gleichen lineup: B. McArthur, J. Arthur; G. MacLean; Moonlight; S. Williams; Queenston; A. Quennell; Innerville; Cluny; Miller; Arrowood; Dr. McIntyre; L. Stinson; Hazelton; Jeffers and Allstott.

The ability some of the players displayed was astonishing considering the time they have been out of baseball. If all the former players turned out the All Stars of Gleichen would have a job in their hand to beat them in a game.

Several of the former player stated they would rather play a Gleichen All Star team than any other outfit. There is something to this as both teams can easily field two complete outfits.

In the case of Rockyford last week they were short two men and the All Stars had to supply the necessary men, which from a spectator's standpoint detracted from the game.

Last year the game lost interest after the sixth with the Old Timers and All Stars played. This year the promoters thought something had to be done so were game to try another team. To our way of thinking it was a good idea since it demonstrated that the All Stars and Old Timers can make a really attractive game if the latter club is at full strength.

Canadian feedstuffs are imported into the United Kingdom free of duty and are exempt from import duties chargeable on foreign merchandise, provided that the British Customs authorities are satisfied that the conditions attached to the concession of Imperial preference have been fulfilled, that is, the inclusion in the shipping documents of the proper certificate of origin.

## BLACKFOOT M. D. COUNCILLORS IN REGULAR SESSION

A regular meeting of the Blackfoot municipal council was held last week.

It was decided to increase the funds for market roads in division 5 to the extent of \$75.

The secretary was instructed to have the attention of Hon. W. A. Fallow, minister of public works, to the condition of the Strathmore-Gleichen Highway and point out that due to the crop conditions on account of drought and insect pests in the area, the rebuilding of this highway should be an excellent undertaking to meet the rapidly approaching relief situation. Mr. Fallow is also to be requested to meet a joint committee representing interested municipalities when he is in the near vicinity.

Councillor Umbricht moved and carried the following resolution: Whereas there is a very dangerous small knoll or sharp dip on the Trans-Canada Highway about five miles east of Strathmore, which has caused innumerable automobile accidents resulting in the loss of thousands of dollars in damages, many serious injuries and at least one death, this place is so dangerous it may be classed as a "death-trap."

And whereas very dangerous places or death traps should not be located on any main highway, this dangerous place should be remedied or leveled and made safe for travel; public immediately; it could be made safe with a reasonable or limited amount of expense.

Therefore be it resolved that this Municipal District go on record, drawing this dangerous place to the attention of the government, and requesting that it be remedied and made safe for the travelling public immediately.

A copy of this resolution is to be sent to the Minister of Public Works and the Federal Minister of Labor.

It is decided that as the 1937 drought and insect pests have affected crops in the whole of the district application should be made to have the whole municipal district, except irrigated lands, included in the federal area for direct relief.

The council ordered the power grading outfit shut down for the season on account of drought conditions.

Canadian feedstuffs are imported into the United Kingdom free of duty and are exempt from import duties chargeable on foreign merchandise, provided that the British Customs authorities are satisfied that the conditions attached to the concession of Imperial preference have been fulfilled, that is, the inclusion in the shipping documents of the proper certificate of origin.

## CORRESPONDENCE

Editor The Call:

I often wonder how many of us are cognizant of the fact that we are witnessing, in these times, the passing of a generation of men and women who have in their brief span of life, seen and experienced in varying degrees, greater changes in the world's development, than has been the lot of any generation before in the world's history. I might add, if I were to attempt to prophecy any generation yet to come. Most people do not seem to realize what wonderful almost miraculous changes have taken place in this period. From horse drawn street cars to the modern air lines; from candle light to the throwing of a switch that will flood a whole city with brilliance; from walking paths and hand sawing to the combine; from humble joys to the talking machine, the moving pictures, the radio. These could be enumerated many more instances of startling changes in all lines of human endeavor. So true is this that those who have lived through it all and been at all observant must gaze with wonder at the now accepted mode of life. Yes, the pioneers of this last west have seen wonderful changes and now one by one are laying down the burdens of life for other hands, more to the manner born, to take up.

How often have I thought of such things, when attending the burial service of an oldtimer whose toll worn body lay calm and still before me. How he had struggled. How he had

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Thursday July 19, 1917.

Harry Carrick is almost bursting with joy, and all over the "only boy," who arrived Friday. Three in three years is pretty good Harry.

The halstorn that swept over Nakama last week was the worst ever experienced by the farmers of the district. It certainly made a clean sweep of the grain north of Nakama. Van McLeod, the pioneer auto man, is adding an addition to his Central Garage.

J. B. Johansen sold a load of hogs, 16 in all which netted him \$673. Geo. F. Taylor of Gleichen was the purchaser.

Many Gleichenites took in the Medicine Hat Stampede which was a grand success, but complain of a holdup at every turn—25¢ for shoe shine, 15¢ for ice cream cone, a little too far advanced for them. McHugh Bros. horse "Fox" maintained his record as the world's greatest bucking animal and a number of our cowboys won prizes.

T. H. Beach is going to offer J. A. Emmerich's household effects for sale Saturday. Mr. Emmerich is leaving for California.

Gen. C. House has disposed of two carloads of hogs to Wm. & Jack Hill, Hill's son from Winnipeg on Friday last from where he shipped several carloads to city to Toronto.

L. Michael has moved his tinsmith and plumbing business to 5th Avenue, opposite the town hall. He reports very busy.

Mrs. Wishart took her place again in charge of the ladies department of the Busy Store after an enforced vacation of a couple of weeks caused by an accident while riding in an auto. The car gave a lurch and struck her head sustaining a nasty cut on the forehead, making it necessary for Dr. Farquharson to put in several stitches. The cut was very deep and bled so profusely that for a time it was feared she might not survive.

Along the Alderidge line four elevators have recently been burned and now it is believed alien enemies are responsible for the fires. There are at present a number of alien enemies, who were recently let out of internment, now working in the section gangs.

conquered or been conquered by life's vicissitudes. At last life's fatal fever was over. Who knew? Did he ever have dreams of the land of his birth? Dreams of far off hills and fields of Ireland, of the sweet scented lanes of old England, or, mayhap, of the steppes of the far flung Russia. Perchance, when a boy he lived in the blue waters of the Danube. Possibly the golden west lured him from home like Eastern Canada or from some state of the great Republic to the south. No matter where from, on such occasions, I often wonder did he ever sigh as did David of old, "Oh could I but drink of the water of the well that flows by the gates of Bethlehem." But in vain—life is like that, there can not be turning back.

"Feeft that have entered the Western door."

"Never return to the scenes of yore"

"Wandering boy comes nevermore"

"Never again."

"Now he has arrived at Journey's End. The fields that he tilled, the houses that he tended, the dog that came to greet him at the gate, his cows that he milked, when he will all know him no more. He has turned in at the old familiar gate for the last time. No more will he scan the skies in hopes of rain or in fear of

"Lay low his work is done"

"What cares he had for friend or foeman"

"Rise of moon or set of sun"

"Hand of man or kiss of woman."

"When we sing that soul quieting hymn,

"Abide with me"

"Farewell falls the eventide."

How many of those present think of the words "Farewell falls the eventide." It is an occasion of this nature that brings to your attention the fleetness of life for it is as true for all as for the mute remains in the casket, silent evidence of its sad truth. And when the strains of that grand old hymn, "Nearer My God To Thee" fills every neck

and corner of the little church, I feel almost unconscious of my surroundings.

"And when the goal is won

"How like a dream

"Sorrow will seem."

He who could at such a time remain unmoved in a strange being indeed.

Then we are all gathered at the graveside. The casket is being lowered into the earth. All is still. Here are gathered his relatives and friends to pay last tribute to one whom they all knew and respected. The minister starts the Lord's Prayer: "Our Father who art in Heaven." What a wonderful prayer, couched in such simple language yet containing so much, all that is needed. Yet at times it is spoken in such a monotone that I would like to stop my ears and forget where I was. You would think, that at the closing of life of one who was near and dear to us all, when in vocation is being offered to Supreme Being, such an invocation comes in such simple yet elegant language, an invocation in which is contained an appeal for our daily wants and "Thy Kingdom come on earth as it is in Heaven." You would

think that this invocation would come straight from the heart to the throne of the Almighty, but ah, too often it is a hollow mockery.

In a few moments all—are gone; the glowing west proclaims the winged day. The old timer has come to the end of the trail.

"Deep rest quietly  
Sleep under ground,  
Sleep of your kingdom,  
Of numerous sound,  
Hear the birds singing,  
Sweet for the mowing,  
Hear the stars sing  
As they travel round;  
Grass blade and star dust,  
You, I, and all of us  
Deep underground."

"Sleep deeper, brother;  
Sleep and forget  
Red lips that trembled,  
Eyes that were bright,  
Turn to your sleeping,  
Life has no giving,  
That death need regret,  
Hear at the end of all  
Life's but death's seneschal  
Sleep and forget!"

AN OLD TIMER.

## YOU Share in Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

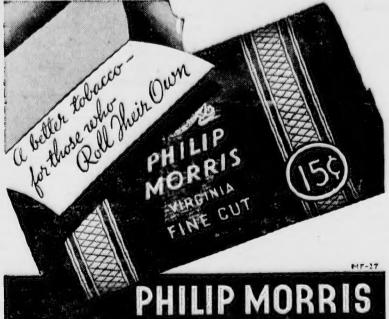

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

## A Helping Hand Needed

Something should be done to ensure a substantial reduction in the marine insurance rates at present prevailing for cargoes shipped from Canada to Europe via the Hudson Bay route. If Western Canadian farmers and shippers are to reap the full benefit of the national investment in the short route between the two continents.

Under existing tariffs it costs approximately four and one-third times as much to insure a cargo of grain or any other commodity from Churchill to a European port as from Montreal to the same destination on the other side of the Atlantic.

In view of the numerous mechanical and other safeguards for shipping using the route provided by the government and in the light of experience this differential is too great and is not warranted in making comparison of the hazards as between the two routes.

This statement is made, too, in the full knowledge of the fact that two disasters are charged up against the route, including the comparatively recent loss of the Bright Fan, but with respect to the latter, if statements made in Parliament can be credited, this latest disaster cannot be blamed upon the route itself.

Figures revealing the unwarranted spread between insurance rates for the two routes were quoted by Hon. C. D. Howe, Minister of Railways, in the House of Commons at the last session when he announced that a ship cargo from Montreal to Europe was assessed \$1,812.50 compared with a charge of \$7,875 levied on a similar cargo from Churchill to Europe.

Another interesting bit of information given by Mr. Howe at the same time was the announcement that to date the country has spent a total of \$43,000,000 on the Hudson Bay railway and the port of Churchill and its facilities.

At four per cent this would entail an annual interest charge of close to a million and three-quarters dollars. Not only does the rate at present fail to earn a dollar of this overhead but, in addition, the revenue fell short of operating expenditures last year by \$236,000.

In other words before the short and direct route between Western Canada and the European markets can be made to pay its way, its annual revenue must be increased by at least another two million dollars per annum.

There is only one way that this can be done and that is by increased volume of traffic using the route and anything that militates against this objective must be overcome as speedily as possible. One of these impediments is the high marine insurance tariff. Another is, of course, the short navigational season, involving the necessity of carrying stocks of grain over from one season to another to ensure cargoes for incoming boats and resulting in the accumulation of storage charges. When these two handicaps are combined they present a wall which is difficult to surmount.

Nature at present blocks the way to an extension of the navigation season, though there is always a possibility that science may someday come to the aid of the route in this respect. The other handicap, that of marine insurance rates, however, is one which must be overcome when it is removed from the list of unimportant and negligible factors.

If this particular handicap is removed it should go a long way towards reducing the cost of using the route and this, in turn, cannot fail to result in the increased volume necessary to ensure and maintain lower freight costs and hasten the day when the Hudson Bay route may be expected to stand on its own feet financially.

Evidence that the rates are an excessive surcharge on shipping using the route was given in the House of Commons by Mr. Howe when he said that he had spent a great deal of time at Churchill and had talked to many captains of ships entering the port. He testified that they agreed it was "ordinarily a safe route as Hudson Strait was wide and deep and the danger of ice was slight owing to the service provided by the government ice breaker which kept tab on ice movements."

There are two or three means which might be used to either ensure reduction of the insurance rates or to bring about the same effect. One of these is for the interested governments to bring pressure to bear on the rate-fixing organization by submitting overwhelming evidence that the rates are beyond reason. The other is to subsidize the route to the extent of the insurance surcharge until such time as increased volume of traffic will enable the route to absorb this burden without loss or until the rates are reduced.

If the first is tried and fails then, perhaps, the latter method should be given a trial. A good argument for at least temporary subsidization is to be found in the fact that the government is giving subsidies to shipping companies operating on both the Atlantic and Pacific coasts, as pointed out by some of the western members or more than one member of the subject has been under discussion.

## Natural Water Heater

Science has talked for years of using the power of the sun; Arthur Dreyfus gasoline station proprietor, in Sennett, New York, has done it. He built a 1,000-gallon tank and lined it with aluminum. He says the sun, striking the shiny surface on a hot day, heats the water to 120 degrees.

Tokyo's busiest district is the Ginza where 237,700 pedestrians were counted in one day.

## WAKE UP LIKE A CAVE MAN!

Jump out of bed fast of life. Say good-bye to dull, tired mornings. Help yourself to glowing health. Get rid of tired, sluggish, bad-taste, headache mornings. Follow the example of the Orientals. Eat fruit-a-tives. Health and energy with fruit-a-tives. Doctor, fruit-a-tives contain extracts of healthy liver action, stimulating the flow of bile, helping four other vital organs . . . stomach, liver, kidneys, heart. Fruit-a-tives have a tonic effect bringing new energy, new health. Fruit-a-tives are the best tonic for all everywhere. Cost is low, 25¢, 50¢.

FRUIT-A-TIVES TABLETS

## His Twenty-Fifth Trip

This has been the twenty-fifth trip to England of His Royal Highness the Maharaja of Baroda, who has been representing India both at the Coronation and at the Imperial Conference. He was there for King George V's Silver Jubilee celebrations. He also saw Queen Victoria's Jubilee, and thinks that he must be the only one of the Indian Princes in England to remember her Durbar ceremony in India.

## Not The Final Answer

Conditions are improving, but the farmer depending on revenue from cheese, cream, eggs, hogs or cattle, finds prices below the 1929 level but expenses on a par or a little above the level of that year. What a commodity sells for is not the final answer. The crux of the situation, says the Farmer's Advocate, is this: What can we buy with a bag of potatoes, a dozen eggs, a pound of butter or a day's labor?

Birds fly only to protect themselves or to obtain food; they prefer not to do so.

## Agriculture In Britain

## Farmers Could Supply Sufficient Food For Long Time

Britain will never be self-sustaining agriculturally, but if war comes and supplies are cut off, she can carry on for a long time before she caves in.

This was learned from Arthur G. Street, the farmer-author who later addressed a luncheon meeting arranged in Toronto by the Royal Winter Fair, the Canadian Club and the Empire Club.

Mr. Street says Britain's place in agriculture has been under-estimated. In dairying alone, she employs more men than are employed in shipbuilding and electrical engineering combined. Her total output in agriculture is four times that of South Africa, considerably larger than that of Australia, and almost as large as that of Canada. In use of scientific contraptions for farming she is slightly ahead of this Dominion, writes C. B. Pyper in the Telegram.

British farmers, he says, will never be plutocrats but they will never be poverty-stricken for the reason that no government can afford to let farming go down. Without the farms there would not be a wartime one thousand dependent completely on foreign sources for food. With her farms she can feed herself for a considerable time.

One of the purposes of his visit to Canada is to let Canadians know that when the British government does something for farming it is for reasons not purely connected with the welfare of one section of the population—it is partly because the safety of the country is dependent on the continuance of her agricultural industry.

Mr. Street, who is widely known as the author of "Farmer's Glory" and other books, is six feet two, weighs 215 pounds, has a pleasant Wiltshire accent and a manner to match. He is a popular broadcaster, operates a farm of 300 acres and works every morning—by machinery. When a lad in his teens he worked three years as a hired man in Manitoba. "Did you learn much in Canada?" he was asked.

"I can safely say I owe everything I have done in the way of writing to Canada," he said. "In the three years I was here I never saw a book and lived for a great part of the time alone in my own shack. That let my mind go follow, and anything I have written comes from that period."

Mr. Street lives on the same farm and sleeps in the same bedroom where he was born. It is a rented farm, and his father was the tenant before him. Asked what he did to make ends meet, he said he had been trying to sell his farm for England, he laughed and he could show me farms of 7,000 acres.

Farming, writing and broadcasting make, he believes, an ideal life, if you can make your living at them. The farm is the backbone of it all, he says. Without it he could neither write nor speak. With it he gets a new thought or a new subject for every day and he doesn't have to get mad any more to get it off his chest.

## Petrified Forest

## Trees Turned Into Solid Stone In Northern Rhodesia

A petrified forest where trees have been turned into solid stone has been discovered in northern Rhodesia.

Thousands of these stone "logs" have been found in the bush. The marks of the grain, the annual rings and even the bark can be clearly seen in the stone.

The forest was found by F. MacCrae and F. Gordon Lancaster, both well known English archaeological work in South Africa.

Known to the natives as the Zinwa forest, the petrified trees are in the Lundazi district of Northern Rhodesia, not far from the borders of Nyasaland. It is thought probable infiltration of lime and other mineral-bearing water was responsible for the phenomenon.

## Class Distinction

## Royal Henley Regatta Will Allow Mechanics and Laborers To Compete

For the first time in its history the Royal Henley Regatta next year will allow mechanics, artisans and laborers to compete.

Action effecting this change was taken by the Amateur Rowing Association following a campaign of protest against what was termed "class distinction."

The clause which hitherto had defined the term "amateur" in a rowing club was the "one who does not row for pay."

Bouncing cranberries is not a playful game, but a regular test of cranberries in grading them for market; berries in bad condition won't bounce.

Birds fly only to protect themselves or to obtain food; they prefer not to do so.

## Requires Skilled Surgery

## Doctors Explain How New Pipeline To Heart Is Built

Building a new pipeline to the heart in one of the most delicate of all surgical operations was declared by Dr. Harold Fell and Dr. Claude Miller of Cleveland to have brought back to near normal a dozen people near death from starvation of the heart.

In an address before the American Medical Association at Atlantic City the Cleveland surgeons explained they sever a portion of the large chest muscle and insert one of the free ends into a small slot in the pericardium, or outer sac which encloses the heart itself.

This end of the muscle attaches to the heart, they explained, by natural growth and thus a pipeline is established from the blood supply of the muscle to the heart. Twenty patients in advanced stages of heart disease have had these pipelines installed, they added, and all died within 10 days after operation.

The remaining 32 were materially benefited and five of them returned to the jobs held before the operation. Further refinements of technique promised to further reduce the number of deaths from the operation, Dr. Beck declared.

## Wages Low in Jugoslavia

## Workers' Pay Just Allows Them A Wretched Existence

Women employed in industry in Jugoslavia are rapidly increasing in numbers, according to data contained in the daily paper Pravda. The number has mounted from 61,000 to 230,000 in three years. Of these, almost half are under 22 years.

This rapid increase in the number of women workers is said to be due to the economic crisis. The wages of men and women have been forced to seek employment in order to eke out the family income. This very fact causes a still greater decrease in the pay of both men and women.

Most women receive less than half a dollar a day, and girls even less. Jugoslavia's labor laws, which are excellent in theory, are left unapplied in a great many cases.

Pravda, which is a conservative daily, says: "Wages are sinking and working conditions are getting worse. More women are asking for work, most are disorganized; so the employers are able to press the pay down to the bare level of a wretched existence.

## SELECTED RECIPES

## PLAIN BLANC MANGE

2 cups hot milk  
4 tablespoons Benson's Corn Starch  
3/4 cup sugar  
1/4 teaspoon salt  
1/4 cup cold milk  
1/4 cup vanilla

METHOD: Scald corn starch in double boiler. Mix corn starch with milk in small bowl. Add slowly to hot milk, stirring constantly until thick. Cover and cook for 35 minutes, stirring occasionally. Remove from heat; add flavoring; pour into moistened moulds and chill. Serve with jam, jelly, canned or raw fruit, or Custard Sauce, or "Crown" Brand" Corn Syrup.

## Belongs To Sea Gods

## Chinese Sailors Return To Talk To Rescued Quartermaster

Although Haw Tso Chang, 54, Chinese quartermaster of the lost steamer Haiping, was rescued from drowning by the crew of the Milford, he is still officially dead to his countrymen, who say that he now belongs to the "sea gods." They refuse to talk to him or to release him. Before the Milford reached Brisbane, Australia, they nearly decided to throw him back to the "sea gods," from whom they said he had been taken.

Heavy seas washed Haw Tso Chang off the Haiping. He was thrown an oar, which he tied beneath his knees. He wrapped his lifebelt around his neck, and floated towards the Milford. Had he floated back towards the Haiping he would not have been picked up. He would have had to escape from the "sea gods" by himself. He is now being blamed for the rough weather the ship encountered. The Milford arrived at Brisbane with the Haiping's crew and stories of heroism in wild seas.

Customer—Are you sure this part can talk?

Dealer—Can he talk? Why, a woman's club sold him to me because none of the members could get in a word.

Bouncing cranberries is not a playful game, but a regular test of cranberries in grading them for market; berries in bad condition won't bounce.

## Testing Out New Device

## Gadget Which Marks Papers Works At High Speed

The development of a gadget to correct and grade examination papers automatically may revolutionize education. At least it will simplify the tasks of teachers, many of whom work long hours after school is closed to mark the examination papers of their students. The teachers do not have the short hours which many claim they have owing to the demands of other duties necessary in connection with their positions and mainly to the marking of examination papers. So, if and when this new gadget becomes universally employed, the overworked employees of places of learning may throw their hats into the air and give three hearty cheers.

The device which has been sponsored at Athens, Georgia, is said to work with the speed of electricity and will correct an examination paper of the true, false, or selective question variety and show the grade of a meter. F. S. Beer, examiner of the university system of Georgia, who had a hand in pronouncing the machine's development, reports that it works on the principle that a soft pencil mark is electrically conductive. The current of electricity flowing through the pencil marks made by the student causes the recording device to function.

Truly such a device should result in a great saving of time. In connection with the operation of the device, the student writes his answers in one of two or more optional forms on a standard printed form. As each paper is inserted in the machine, electrode blades descending on the paper determine which questions have been answered correctly. Time will tell whether the device can be made to function accurately.—St. Thomas Times-Journal.

## Let Babies Cry

## Doctors Say They Are Merely Trying To Raise Their Blood Pressure

Don't pick a baby up when it cries, a group of University of Georgia physicians cautioned, because it is merely trying to raise its blood pressure. By new delicate methods of measurement they have determined what babies have been trying to tell their adult mentors for thousands of years. These measurements have shown that at birth a baby's blood pressure is 75 per cent of the pressure of adults, they declared, and the baby knows that to grow properly it must begin building up steam.

## Apples Traced To Asia

All of our apples, food historians say, probably developed from the sour crab apple of western Asia. The colonists found the wild crab growing here when they settled along the Atlantic seaboard. Rightly assuming that the climate was ideal for the development of orchards, they imported apple seeds from England and France. From that beginning the United States has become the most important apple producing country in the world.—Rocky Mountain Herald.

Clouds hide the sun only about 12 per cent of the time in Yuma, Ariz. Papyrus hide the sun only about 12 per cent of the time in Yuma, Ariz. The stem of the giant bamboo tree may grow a foot in a single day.

## WAKE UP YOUR LIVER BILE—

## And You'll Jump Out of Bed in the Morning Ready to go

The liver should pour out two pints of bile into your bowels daily. If this bile is not purged away it will collect in the bowels. Gas builds up pressure and when it goes into the body, you feel pain, and the world looks pink.

The cause you need something that works on the liver.

Carter's Little Liver Pill to get these two pints of bile out of the body. It makes you feel "up and up." Energetic and gentle, they don't burn the body freely. They do the work of nature. You have to take them in them. Ask for Carter's Little Liver Pill by name. Substitutes, never buying the fake.

## Praise For Little Theatre

## Movement In Canada Forging Ahead, Says Michael Saint Denis

The Little Theatre movement in Canada is going ahead with leaps and bounds. The stage is well on the way to becoming professional "in the right way," says Michael Saint Denis, who served as adjudicator in the annual drama festival in Ottawa.

Saint Denis was high in the praise of the standard of the plays offered and the work generally being accomplished in the amateur theatre in Canada.

"I regard this as very encouraging for the future," he said, "as I have always believed the best kind of theatre comes from the people themselves. It is not something that is forced on them out of financial motives, from above."

He found Canadian spontaneous and alive. The audiences, he said, were very responsive, intelligent and interested in the technical points of a production.

"The thing that I missed was a leader and a central organization to bind all these activities together," the director declared. "The distances between them are immense, I know, but a more frequent interchange of ideas would be valuable and it ought to be possible for a well-chosen professional company from this country to tour Canada every year and give the people there a wider standard of comparison."

## To Photograph Eskimos

## Young Boston Man On Expedition Into Northern Canada

His duffel bag already packed, 27-year-old Prentiss G. Downes of Boston, prepared to leave on a one-man photographic expedition into the northland of Canada and the sub-Arctic.

Downes will take pictures of Indians and Eskimos and of the country through which he travels, for the New England museum of natural history, sponsor of the expedition.

The blue-eyed and slightly built scientist will enter the northern wilderness from Flin Flon, Man., and live for six weeks among the Crees and Chipewyan Indians.

Early in August, he expects to return to Fort Churchill on Hudson Bay, and board the Hudson Bay Company's relief ship, H.M.S. Nasco, for her annual visits to the company's northern posts.

Papyrus from which our word "paper" comes, was called "biblio" by the Greeks.

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VII.—Continued

As I lay stretching myself on the broad of my back after the cozy sleep of the night, the thought of the schoolmaster came to scatter the fairness of the morning. So, with an old broom on my shoulder and much fear and trembling in my heart, I set out bright and early to make a call on Mr. Michael Hughes, the local schoolmaster. With any ugly, hard job on hand, I have always figured that nothing much is gained by just bursting up daylight. The ground was frozen hard.

A few years before, the settlers had got together and put up a log schoolhouse on the townsite, a tidy step down from the Marshall farm. One foot-loose itinerant after another had turned his hand to school teaching, and earned a few shillings the quarter for each scholar who trudged down to his classes to get a little learning. But bright shillings being a scarce commodity in Mono, the schoolmaster shifted round weekly from family to family, fetching the cream of local gossip with him, and getting board and board to eke out the extra pennies that came his way. And, at the table, the schoolmaster usually found that the man of letters was man of parts. The younger children were somewhat regular in their attendance; but, in the late fall and winter time, big clumsy youths as a rule went also to the local school to learn to write and figure. Many of them had hair showing on the face, and the diseases were common among them for which scratching and sulphur are the principal remedies. They came packed with a loutish devilment that sometimes overtaxed the strength and courage of the schoolmaster. One after another the teachers had been beaten up, and had left for other fields of effort.

In the spring of 1846, Michael Hughes had drifted into the township out of nowhere seemingly, and had tackled the job of teaching the Mono school. He was the tall, lank figure of a man, neither young nor old, but of five and thirty, which is, of course, a sera old to the mind of any child. His body was as lithesome as a gnat and as supple as the wind. His features were clearly chiselled fine, yet robust limbs, and a soft, silken-like beard hid a mouth that was gentle, even to weakness. He thrashed civility under the skins of the big yokels that fell; and so established himself securely as master of the school. Old Hickory Mick earned himself a terrible reputation among the plow boys of Mono as a disciplinarian and wielder of the cane.

The business of boarding around as a nuisance to the farmers' wives did not sit well in with his notions of comfortable living, and the master promptly solved his problem by moving into a small house that had recently been built on a conveniently steep board hard by to the west of the school. There was little household trumpery about, but sufficient for his purpose. The parents of his pupils paid most of the school fees with food and firing. The steepness of his land was such that no plowman has ever turned any of it over. Years after, the little plot was occupied by Jimmie Buchanan, a cobbler who kept bees; but in the master's time it was covered by a scrubby growth and crowned by a gnarled thorn-tree. Folk called it the "Whistling Hill" after Knocknafusdale, Cumbria, Down. All the children knew the master was a gentle soul, and greatly haunted by the little people. One Hallowe'en night, three separate passers-by saw lights, like tiny risks dancing on the hillside below his cabin, and

there were soft, piping sounds also heard about the place, like the small, thin whistle a drake gives after ducking himself in a pond.

I found the one door of the schoolmaster's house slightly ajar; and, sticking my head in, I saw the man's back as he stooped over the fire-place, cooking his breakfast in a big black, frying pan. With the broom still clutched in my hands, I stood in, and quietly sat down on a short log. I kept my mouth tight shut to hold my breath from squeaking.

In a moment's time, Old Hickory Mick swung around, holding the long-handled spider aloft. He gave his head a starchy jerk in the air as he spied me sitting there. He looked like to eat me all up without a grain of salt.

"You little red-headed son of Bellair!" he shouted at me, "how dare you set foot in my house without knocking at the door?"

"Oh, sir!" I said, "that's not my name. I'm Paddy Slater, sir; and I've come down," said I, "to look after things at the school, and to rid up your dirty old cabin, sir."

The man froze me with a hard stare.

"By the hole of my coat!" he exclaimed after thinking the thing over.

"What gave you instructions to come down here?"

"Oh, sir!" said I, "it was Mrs. Marshall, sir! She said I might stay at her place if I'd rid up your dirty old cabin, sir."

There was a pause.

"Are you frightened?" the man asked me, screwing his mouth up with a wide smile.

"Yes, sir," said I, "I'm scared stiff you will beat me with a stick. But she said I was to rid up your dirty old cabin, sir. So I just upped and inned."

"Well, Paddy," the man told me after a further pause, "the Greeks had a brave word for a lad who faced a danger, yet strode out to meet it."

"Yes, sir."

"And speaking of words," he thundered at me, "it's a careless little lar you are to call my house a dirty old cabin!"

"Yes, sir."

"And it is not a dirty cabin, I'll have you know, because it is sweet and clean—though perhaps a trifle untidy."

"Yes, sir," said I.

"And it is not a cabin at all, I'll have you know, because it has boards on the floor."

"Yes, sir," said I.

"And it is not a cabin at all, I'll have you know, because it has boards on the floor."

"Yes, sir," said I.

"And it is not a cabin at all, I'll have you know, because it was actually theirs for keeps. At the first sign of listlessness, he promptly bundled the small bodies out to tumble about in the fresh air. In his crude and simple theory, the teacher is wasting his time unless he actually holds the pupil's fixed attention. And in his opinion, twenty minutes was a long time for a young child or an old man to keep his undivided attention fixed on any one thing. In any event, for the first year, I got my instructions at Whistling Hill and not in the classes at the schoolhouse.

(To Be Continued)

The purple finch turns yellow in captivity.

Eighty per cent of tornadoes occur between the hours of noon and 6 p.m.

BRITISH NURSES FLY TO TEND NAZI WOUNDED

Four Army nursing sisters were flown from England to Gibraltar in two R.A.F. Flying Boats when word was received that the German warship "Deutschland" had been bombed by Spanish planes and had put in to Gibraltar with eight wounded sailors. This picture shows two of the nurses on the plane preparing to leave Calshot late at night.

Rheumatic pains are torture!

### ROYAL CAKE CUTTER

One of the newest and best pictures of Princess Margaret Rose, younger daughter of the King and Queen, shows her as she cut a cake at a recent Coronation Tea Party in London.

### To Create Better Feeling

#### Breaking Down Of International Prejudices Is A Splendid Thing

America is going English; English is going American. There is a general merging, at least in superficial matters, of two distinct civilizations. It is a splendid thing. In fact from this peculiar phenomenon we may draw a great moral and detect in the seeds of hope. For such, after all, is the only true internationalism—which must spring from a community of interests and a coincidence of tastes. We understand a fellow who wears clothes like ours and who plays bridge according to the conventions which we observe; we understand him because we understand him to be honest, hopeful, a time when this tendency will spread across the world, breaking down even the barriers of language. We look forward to a time when Frenchmen will not longer be "Frogs" to those provincial souls who pass their lives in Surbiton and other London suburbs; a time when Englishmen will not be regarded by the Germans, Swedes, Italians, French and Slavs as swindlers, doltic incapable of saying more than "Yes," "No," "Thank You," and "Good-bye" in any tongue other than their own; a time when Americans will be recognized in every part of Europe as civilized and well-informed persons, and Europeans will be recognized as good sports in all America.

We look forward to a time when we shall be able to encircle the globe without attracting hostility or curiosity, and when even cannibal kings will find a welcome in our homeland.—Hamilton Spectator.

### Wheel Of Plane Found

Believed to be part of the aero-plane used by Sir Charles Kingsford-Smith and his co-pilot J. T. Pethbridge on their fatal England-to-Australia flight in November, 1935, an aeroplane wheel with tire and axis was recently found near Moulmein, Burma.

Stream Lining And Diesel Engines Produce New Fast Records

During the past two or three years railway speeds have been increased in all lands, due particularly to stream-lining design and Diesel engines, although some remarkable records, such as a fast of a few years ago, have been made by steam locomotives.

The announcement that the Broadway Limited between New York and Chicago will, with a new locomotive now being built, travel at a sustained rate of 100 miles per hour, is not, in the light of modern progress, surprising.

The attempt at such an objective was almost inevitable. The present time for the distance by the Pennsylvania Railroad is 13½ hours, under the proposed schedule this would be about nine hours, the distance being 910 miles.

At present the German State Railways hold the first half dozen or more long distance speed records with Diesel trains, the best being between Berlin and Hanover, 185 miles, at an average speed of 82½ miles an hour.—Stratford Beacon-Herald.

### HER LIMBS WERE ALMOST CRIPPLED

#### Suffered With Sciatica For 25 Years

Those who are subject to sciatica should read this letter from one who suffered for 25 years and who found out how to obtain relief:

"For 25 years I suffered

from sciatica in my right side, and I had to lie in bed for two or three weeks at a time. When I got up in the mornings, my arms and legs used to pain terribly. On one day I heard of Kruschen Salts. I took a bottle of them without feeling much improvement. I tried a second bottle, and the third time I felt better. I have kept on taking Kruschen ever since."

The pains of sciatica are frequently caused by an excess of uric acid in the blood. Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these salts assist the internal organs to expel the dissolved acid from the system.

### Little Helps For This Week

The very God of peace sanctify you wholly, and I pray God your whole spirit and soul and body is preserved blameless. Faithful is He that calleth you, who will also do it 1 Thess. 5:23-24.

Be still my soul, the Lord is on your side; Bear patiently the cross of grief and pain; Leave it to God to order and provide; In every change His faithful will remain.

It was no relief from temporal ills the apostle promised. The mercy of God might send them to the stake or to the lions, but it was still His mercy if it kept them unspotted from the world. It might expose them to insult and wrong, still they received it as mercy if it established them in every good word and work. How many of you are content with such faithfulness as this on the part of your heavenly Father, and is this indeed the tone of your prayers?

### Higher Railway Speeds

#### Stream Lining And Diesel Engines Produce New Fast Records

During the past two or three years railway speeds have been increased in all lands, due particularly to stream-lining design and Diesel engines, although some remarkable records, such as a fast of a few years ago, have been made by steam locomotives.

The announcement that the Broadway Limited between New York and Chicago will, with a new locomotive now being built, travel at a sustained rate of 100 miles per hour, is not, in the light of modern progress, surprising. The present time for the distance by the Pennsylvania Railroad is 13½ hours, under the proposed schedule this would be about nine hours, the distance being 910 miles.

At present the German State Railways hold the first half dozen or more long distance speed records with Diesel trains, the best being between Berlin and Hanover, 185 miles, at an average speed of 82½ miles an hour.—Stratford Beacon-Herald.

### Heavy Flying Boats

#### Ships Weighing Thirty-Five Tons For Atlantic Air Service

Flying boats weighing approximately 30,000 pounds (about 35½ tons) are being designed for the Atlantic air service, it was learned in London.

The ships, to be built by Short Brothers of Southampton, are expected to be ready for trial flights in 1939. They will have a cruising speed of 180 miles an hour and will be twice the weight of the Caledonia and Cambria, types of flying boat at present being used on Imperial Airways air routes.

The new flying boats will have accommodation for 20 passengers and a small quantity of air-mail.

### Found It Hard Task

Four explorer-scientists of the Soviet Union plumbed the North Polar seas from their ice floe wintering camp and reported by radio to Moscow they found a depth of 14,075 feet. It required three hours of grueling labor to lower the sounding apparatus and twice that long to pull it up again.

To enable his army to cross the Tigris and Euphrates rivers, the emperor Julian had built a bridge of boats made of skins stretched tightly over osier frames.

Hairdressing provides employment for 300,000 persons in England.

### About Honey

#### Colour Is Not A Factor In Honey Food Value

The increased use of honey, as a food, for instance, and as a developer of energy for athletes, and an ingredient in home cooking, has not yet been fully appreciated and connected with it. Contrary to general opinion, colour does not affect the food value of honey in any way. Honey varies in colour, from water-white to a very dark brown, according to the kind of flowers from which it is gathered. The difference in colour is caused by certain substances in the nectar of different flowers that absorb the rays of light in varying degrees.

The flavours of honey vary just as much as its colour, and there is no difficulty in finding a flavour to suit the most discriminating taste. As a rule, the lighter the colour of the honey, the more delicate is its flavour. Therefore, when honey is to be substituted for sugar in cooking, it is the light-colored honey that is recommended. When honey is used in place of jams and marmalades, each and every colour or flavour has its advocate.

Granulation of honey, as many people seem to think, is not an indication of adulteration. Rather, it is a sign of purity. All Canadian honey granulates sooner or later, depending largely upon the proportion of the two invert sugars it contains. The greater the proportion of levulose to dextrose, the longer the honey will remain in liquid form. Levulose, or fruit sugar found in honey, is non-granulating and is the sweetest sugar so far found in nature. It is usually the predominating sugar in honey. Dextrose, or grape sugar, is a rapid granulating sugar and is predominant in commercial honeys. Granulation of honey is hastened by low temperatures and high temperatures retard it.

Honey sold in glass containers is usually heated when packed, for the purpose of keeping the honey liquid for as long a period as possible. Rapid granulation usually produces a fine texture while slow granulation tends to coarseness. Granulated honey can be brought back to its liquid form by standing the container in water and heating it to 150 degrees Fahrenheit. A higher temperature is likely to darken the colour and drive off aromas and flavour. Further information on honey will be found in "Honey and Honey Products" by Dr. Spencer-Jones and Sons of the Ways It May Be Used" and may be obtained from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

We look forward to a time when we shall be able to encircle the globe without attracting hostility or curiosity, and when even cannibal kings will find a welcome in our homeland.—Hamilton Spectator.

### Arctic Broadcast

#### May Bring Voice Of Arctic To Canadian Listeners

Feasibility of broadcasting from the Arctic to a national hook-up will be investigated this summer by experts of the Canadian Broadcasting Corporation, who will accompany the eastern Arctic patrol which sails from Montreal in July on the steamship Nasco. It is not the intention to do public broadcasting from the ship this summer but to try out shortwave communication from different points the ship calls at and canvass the possibility in subsequent years to bring the voice of the Arctic to Canadian listeners.

An American author is said to have written a 50,000-word novel without using the letter "u". We not very hopefully await a volume of Memoirs in which the author makes no use of the letter "l".

Horticulturists have dreamed of a thornless rose for years, and now it is a reality. Such a rose was raised at Attica, N.Y., recently.

## Town & District

Leonard Christiansen has been quite ill for the past few days. His many young friends hope that he will soon be around again.

Rev. G. A. Love of Gleichen spent the past week in Gleichen visiting his old friends Mr. and Mrs. Geo. W. Evans. For many years Mr. Love was postmaster at Redlands retiring from that position last December.

Saskatoon berries are now at their best but what are they are few and far apart. Almost any place along the river last year the berries were in abundance, but this year with exception of a patch here and there they are scarce as hen's teeth.

The results of the junior teams in Bow Valley baseball playoffs last week at Queenstown: Arrowwood defeated Milo 22-11; Gleichen defeated Queenstown 9-6. In the final game Arrowwood won from Gleichen 4-2. Gleichen lineup: Jack Cole, Bill Cole, W. Lester, Eugene Lester, D. Garland, W. MacCallum, J. Bentie, McIntosh, A. Bond, Bogart.

Miss Marjorie Birch has received word that she has been successful in passing the ninth grade piano of the Toronto Conservatory of Music examinations. She also passed the theory examinations for this grade, which includes harmonic and musical history, getting an average marking of 84 per cent. Miss Birch has been climbing the musical ladder since she was seven years of age and is now only two steps distant from the top and the much coveted A.T.C.M. degree. Miss Beatrice Oulton, L.R.S.M., of Calgary has instructed her in practical piano work and Miss Jean Somerville, L.R.S.M., A.T.C.M., is also of Calgary in the Theory and Harmony.

### GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister. On Sunday July 25th, at 7 p.m. there will be an open air service on the bank of the Bow River near the Arrowwood bridge. The pastoral charge of Gleichen, consisting of Cluny, Arrowwood and Gleichen will join together instead of having a separate service at each appointment. The Church of the Brethren at Arrowwood will also participate in the service. The music will be accompanied by the Salvation Army Band from Gleichen.

If those wishing to go and having no means of transportation and anyone having room for an extra passenger will speak to Rev. Wilkinson, Rev. J. N. Wilkinson arrangements will be made as far as possible to accommodate all who would like to go.

### OLD TIMERS' ASSOC.

#### MEET AT PICNIC

#### LAST SUNDAY

The picnic sponsored by the Old Timers Association last Sunday afternoon was announced by all as being a wonderful success. Although it was hot it was an ideal day for picnics. During the main part of the afternoon the old timers and friends sat under the shade of the trees and talked while some of the boys and girls went swimming in the river. The boys and girls stated that the water was nice and the cream was naturally welcomed with happy smiles on such a hot afternoon by everyone. All day suckers made ideal prizes for those who were energetic enough to run races.

Many of the older folks amused themselves by playing "clock golf" which though one stands under the direct heat of the sun is not a strenuous game because it consists mainly of putting the ball but a few yards.

Later in the afternoon the ladies prepared a lovely supper of salads, spiced ham and pies, while Kippie James made his old time coffee in the old style. Lunch was served in the well known buffet style. Lemonade was believed by the children to be more refreshing than anything else. About 7:30 they all shook hands and after wishing each other good luck each went his own way for another year.

"If all boys were in the Boy Scout movement, many magistrates and police would soon be out of a job!"—Magistrate S. B. Arnold, of Chatham Ont.

Over 8,000 boys, said to be the greatest body of youth ever to leave one country at one time, will make up the British Empire contingent to the World Scout Jamboree, opening in Chatham July 1st. Thirteen special trains will move the boys to Tilbury, Yarmouth, Dover and Harwich, where they will board 8 steamships for the trip to Holland. In addition to the Scouts from all parts of the British Isles, the Empire con-

tinent will include Scouts from Canada, Bermuda, Hong Kong, Gibralter, Newfoundland, Australia, New Zealand, Malta, Palestine, Northern Rhodesia, South Africa, India, Burma and Trinidad.
